Arthur Troop Scholarship 2016 REPORT

Name of Scholar: Aikaterini M. Schoinoplokaki

IPA Section: Greece (Chania Region)

Course attended: The Long Road to Integration - Islam and Islamism in European Societies, IBZ Gimborn

This is to confirm my participation in the Seminar Program Nr. 16 | 41 "The Long Road to Integration - Islam and Islamism in European Societies" that was held on 31.10.2016 to 04.11.2016 in IBZ Schloss Gimborn.

This seminar was focused, well prepared, and contributed to increase my response in police cooperation in a diverse world, and promoted within me a feeling of security and certainty in European Societies.

Furthermore, my opinions were enriched:

- **in the educational environment**, it is particularly apparent in the educational communities, where the organizational processes are the thumbnail of a democratic system. Cooperation prepares the new cells of the Community to become responsible, thoughtful and active citizens with boldness and virtue.

- **in the establishment and safeguarding of Democracy**, collaboration promotes the inclusion of people with a common front, namely equality, justice, and egalitarianism. Democracy is dependent on the quality of people and at the same time is also its strength. In the framework of a democratic regime, the struggle for a better and humane society passes only through the peaceful and revolutionary road of cooperation and solidarity.

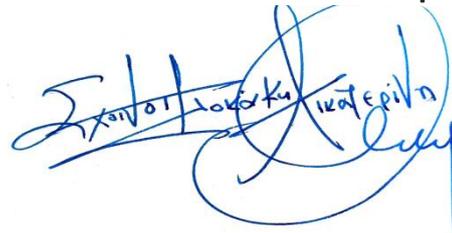

- **in the ensuring of peace**, cooperation imparts universal identity and consciousness of the great issue of *Peace* with secure and unfeigned dialogue between people and nations. Moreover, it normalizes the "*infertile*" areas - disputes between countries. The "*peace problem*", says Albert Einstein, "should become a problem for all people wherever they are:

on the street, at work, in the church, until it becomes a shared consciousness and finds its solution."

For me the fact that it was reasonably concluded is the significant positive influence on the construction of a harmoniously united community when members develop their collaborative nature. All humans regardless of their gender, origin and religion have all the necessary skills, the challenging stimulus to understand and combine all the important theoretical and practical concepts, in order to achieve a quality of life that includes prosperity and happiness.

Finally, I would like to express my sincere gratitude for the direct and immediate response from the Chair of the Professional Commission to every request that I have submitted.
